

PRESS RELEASE

VIOR INC. - TSX VENTURE (VIO) – FRANKFURT (VL5)

VIOR ACQUIRES NEW NICKEL-COPPER PROPERTY IN THE LA TUQUE AREA, QUÉBEC

Québec City, July 31, 2007 - **Vior Inc.** (“**Vior**”) announces the signing of a letter of intent with Normand Fortin, Denis Fortin and Gordon Henrikson whereby it will acquire their Rochette-Savane nickel-copper property located 20 kilometres east of the Town of La Tuque, Province of Québec.

The Agreement

Under the terms of the agreement, **Vior** can acquire 100% of the property by:

1. Making a cash payment of \$20,000 at the close of the transaction;
2. Issuing 250,000 common shares of **Vior** at the close the transaction;
3. Granting of a 1% NSR royalty on the 14 claim property in the event of a commercial production, **Vior** retaining the right to repurchase half of this royalty at any given time for \$1,000,000.

The agreement is subject to the approval of the TSX Venture Exchange.

The Rochette-Savane property which comprises 14 claims totalling 351 hectares, borders and is partially included within **Vior**'s wholly-owned Bourgeoys property. The latter property comprises 70 claims totalling more than 3900 hectares. These properties are easily accessible by forest roads or all-terrain vehicles.

The Potential

From terrain observations recently collected on the property, the nickel and copper mineralization from the Rochette and Savane showings are associated with pyroxenite intrusions of the same nature as those identified on the Lac-Édouard deposit (best mineralized intersection: 2% Ni et 0.5% Cu over 25.6 metres) situated 20 kilometres north-northwest of these showings. The best historic results obtained from chosen mineralized pyroxenite samples from the Rochette showing returned 4.8% Ni and 0.3% Cu as well as 1.2% Ni and 0.5% Cu.

Vior's strategy regarding nickel and copper exploration in the La Tuque region is based on advanced exploration techniques and focused on the search for shallow targets. Our main goal is to discover and develop, with partners, world-class nickel-copper deposits. **Vior** is already in partnership with **CVRD Inco Limited** on its nickel-copper Lac-Édouard property located north-northwest of the Bourgeois and Rochette-Savanne properties.

"We are very enthusiastic about the possibility of increasing our land position in the La Tuque area," stated Patrick Bradley, President of Vior. "We believe the Rochette-Savane property has the potential for the discovery of a large magmatic nickel-copper orebody. Additional exploration work, including diamond drilling, will be carried out on the property this coming autumn," added Mr. Bradley.

Profile

Vior Inc. is a growing mining company focused on acquiring and developing high quality, low risk gold and base metal resource prospects in accessible mining areas of Québec. The Company wholly owns the Douay West gold project which is at a pre-feasibility stage and other gold and base metal exploration interests in prime locations. The Company is aggressively pursuing opportunities to develop working interests in mineral properties that offer significant upside exploration potential. **CVRD Inco Limited** is the largest shareholder of **Vior** with a 12% interest.
